## CORE COMPETENCIES

Bombs Away LLC is a small business specializing in full scale, highly detailed, light-weight replica ordnance.

Organizing as an LLC in 2003, Bombs Away now manufactures over 13 different types of highly detailed replica ordnance, ranging from US WWII aerial bombs, rockets and small munitions, to present day low drag series aerial bombs, and new for 2016, the AIM-9M Sidewinder missile. Our replica ordnance is light weight, easily handled and less stressful on airframes.

With 30 + years of experience in machining, fabricating and mold building, Bombs Away can build and fabricate replica ordnance based off of an actual piece of ordnance, prints, or photos of an original piece.

Partnering with other businesses, we take pride in manufacturing full scale, lightweight replica ordnance for display to preserve history.
