## CORE COMPETENCIES

Bombs Away LLC is a small business specializing in full scale, highly detailed, lightweight replica ordnance.

Organizing as an LLC in 2003, Bombs Away now manufactures over 14 different types of highly detailed replica ordnance, ranging from US WWII aerial bombs, 5" HVAR rockets, low drag series aerial bombs, and present day AIM-9M Sidewinder and AGM-114 Hellfire Missiles. Our replica ordnance is light weight, easily handled for training purposes and less stressful on airframes.

With 30 + years of experience in machining, fabricating and mold building, Bombs Away can build and fabricate replica ordnance based off of an actual piece of ordnance, prints, or photos of an original piece.

Partnering with other businesses, we take pride in manufacturing full scale, highly detailed, lightweight replica ordnance for training purposes, museum displays and to preserve our Nation's history.
